Capability Statement

Mission: To Serve and Continuously Improve under the “Do Unto Others” Philosophy

Cirtronics is a contract manufacturer offering extensive expertise and experience in manufacturing complex and quality-sensitive products. We tailor our fully integrated manufacturing Precision Engagement® processes to ensure each customer's needs are met. We are an Employee Owned Company (ESOP) that qualifies for US Government woman-owned and small business status. We are proud that many of our customers have been with us 20 years and more. ISO 9001, ISO 13485, ITAR and FDA Registered. www.cirtronics.com

Core Competencies

- > **Project Management:** Transitioning from prototype to manufacturing (TTM); supporting production ramps
- > **Supply Chain:** Counterfeit material risk mitigation; awareness/planning obsolescence for end-of-Life (EOL)
- > **Procurement:** Strategies and systems enabling support of production fluctuations while limiting inventory exposure
- > **Mechanical & Test Engineering:** Design for Excellence (DFx) including Design for Manufacturability (DFM) and Design for Test (DFT) expertise
- > **Kanban** and supporting systems design and maintenance based on customer provided forecasts/needs

Differentiators

- > Cirtronics' expertise is the deliberate **organization of procurement and manufacturing strategies** to purposefully align with specific customer needs and seamlessly onboard program(s) to our manufacturing facility.
- > We are dedicated to advanced manufacturing and continuous improvement, with substantial capital equipment investments to ensure innovative technologies.
- > Our philosophy and deep expertise in **information technology** enables our flexibility via integrated data capture and custom reporting.
- > Our **Culture of Ownership**, with 40% of the corporation owned by employees through an Employee Stock Ownership Program (ESOP) since 2002, sustains our overarching commitment to quality and our customers' success.

Our Proof is in our Customers' Success

- > Ava Robotics– Remote Tele-presence Robots for business and medical applications
- > Corero – Network security hardware
- > Endeavor – Robotics for high risk security and military applications
- > GatesAir (formerly Harris Communications) – Assured communication equipment for FAA, FBI and First Responders
- > Syneron Candela – Medical Laser Systems for tattoo and hair removal
